Sentinel AI - Q4 Project Status Report

Author: Engineering Program Office | Date: October 2026 | Status: On Track

1. Executive Overview:
The Sentinel AI hackathon initiative focuses on building prompt-injection-resistant agent workflows for enterprise email, document, and web processing. All development milestones are progressing on schedule across backend, frontend, and security teams.

2. Key Financial & Operational Deliverables:
· Milestone A: Independent Security Architecture & Threat Model completed.
· Milestone B: Policy Engine authorization gates specified for FastAPI backend.
· Milestone C: React dashboard interfaces ready for human approval flows.
· Total Q4 Budget Allocation: $12,500.00 USD approved for cloud infrastructure.

3. Recommended Next Steps:
Review final test coverage metrics and finalize demo script for Hackathon presentation.
